Peter Thiel and his company, Palantir, whose software uses AI and big data to help the Israeli military surveil, target and slaughter hundreds of thousands of Palestinians.

It is also used by ICE, the FBI and U.S. law enforcement to destroy privacy, to attack whistleblowers, and to turn the Orwellian concept of "pre-crime" (identifying and

tracking potential subversives before they commit any offense) into a reality.

Thiel, whose net worth stands at \$10 billion, **bankrolled Trump's successful 2016 campaign** when few others would. He served on his transition team and as an advisor, leading commentators to label him a "**shadow president**."

This time, however, Thiel will enjoy even more influence in the White House, as Trump has selected Ohio Senator and **Thiel protégé J.D. Vance** as his vice president.
